The Fund's performance data represents past performance and does not guarantee future results. Current performance may be lower or higher than the performance data shown. The investment return and principal value of an investment will fluctuate so that you may have a gain or loss upon sale. You can obtain performance data current to the most recent month-end at www.meridianfund.com.

A Class: Prior to 7/1/15, the A Class was named Advisor Class. The annual gross expense ratio is 1.56% as of 10.31.2016. The annual net expense ratio is 1.62% after a recoupment of 0.06% is added to the overall gross expense ratio as of 10.31.2016. The A shares with load include a maximum load amount of 5.75%.

C Class: The historical performance shown for periods prior to inception on 7/1/15 was calculated using historical Legacy class performance as adjusted for estimated class specific expenses, for distribution, shareholder servicing and sub-transfer agency fees, without consideration to any expense limitation or waivers. The annual gross expense ratio is 2.28% as of 10.31.2016. The annual net expense ratio is 2.30% after a recoupment of 0.02% is added to the overall gross expense ratio as of 10.31.2016. If the class had been offered prior to 7/1/15, the actual performance and expenses may have differed from the amounts shown.

Investor Class: The annual gross expense ratio is 1.32% as of 10.31.2016. The annual net expense ratio is 1.32% as of 10.31.2016.

¹The Fund's Index, The Russell 2000® Growth Index, measure the performance of the small-cap growth segment of the U.S. equity universe. It include those Russell 2000 Index companies with higher price-to-value ratios and higher forecasted growth values. One cannot invest directly in an index.

* Since Inception returns are calculated using the Fund's Legacy class inception date of 12/16/13.

Principal Investment Risks

There are risks involved with any investment. The principal risks associated with an investment in the Fund, which could adversely affect its net asset value, yield and return, are set forth below. Please see the section "Further Information About Principal Risks" in the Prospectus for a more detailed discussion of these risks and other factors you should carefully consider before deciding to invest in the Fund. *An investment in the Fund may lose money and is not a deposit of a bank or insured or guaranteed by the Federal Deposit Insurance Corporation or any other governmental agency.* **Investment Strategy Risk:** The Investment Adviser uses the Fund's principal investment strategies and other investment strategies to seek to achieve the Fund's investment objective of long-term growth of capital. There is no assurance that the Investment Adviser's investment strategies or securities selection method will achieve that investment objective. **Equity Securities Risk:** Equity securities fluctuate in price and value in response to many factors including historical and prospective earnings of the issuer and its financial condition, the value of its assets, general economic conditions, interest rates, investors' perceptions and market liquidity. **Market Risk:** The value of the Fund's investments will fluctuate in response to the activities of individual companies and general stock market and economic conditions. As a result, the value of your investment in the Fund may be more or less than your purchase price. **Growth Securities Risk:** Because growth securities typically trade at a higher multiple of earnings than other types of securities, the market values of growth securities may be more sensitive to changes in current or expected earnings than the market values of other types of securities. In addition, growth securities, at times, may not perform as well as value securities or the stock market in general, and may be out of favor with investors for varying periods of time. **Small Company Risk:** Generally, the smaller the capitalization of a company, the greater the risk associated with an investment in the company. The stock prices of small capitalization and newer companies tend to fluctuate more than those of larger capitalized and/or more established companies and generally have a smaller market for their shares than do large capitalization companies.

Glossary

Number of Holdings: The total number of individual equities held by the Fund. **Weighted Average Market Cap:** The weighted average of market capitalization (market price multiplied by the number of shares outstanding) of the stocks in the portfolio, weighted according to its percent held in the fund. **Price to Earnings:** A valuation ratio of current share price compared to its per-share operating earnings over the previous four quarters. **Price to Book:** A ratio used to compare a stock's market value to its book value. It is calculated by dividing the current closing price of the stock by the latest quarter's book value per share. **Price to Sales:** A ratio for valuing a stock relative to its own past performance, other companies or the market itself. Price to sales is calculated by dividing a stock's current price by its revenue per share for the trailing 12 months. **Price to Cash Flow:** A measure of the market's expectations of a firm's future financial health. Because this measure deals with cash flow, the effects of depreciation and other non-cash factors are removed.

ALPS Distributors, Inc., a member FINRA, is the distributor of the Meridian Mutual Funds, advised by ArrowMark Colorado Holdings, LLC. ALPS, Meridian and ArrowMark are unaffiliated.

ABOUT ARROWMARK PARTNERS

ArrowMark Colorado Holdings, LLC ("ArrowMark Partners"), is an employee owned asset manager with specialized expertise in alternative fixed income and capacity constrained equity strategies.
